Project Title: CharityGuard- A Decentralized Charity Donation Platform

Motivation:

Many donors are concerned about the lack of transparency in the charity sector, where funds are sometimes misused or inefficiently allocated. This project's motivation is to provide a **trustless platform.** By developing this platform, we aim to promote **trust, accountability, and efficiency** in the charity ecosystem, potentially reshaping how donations are managed globally.
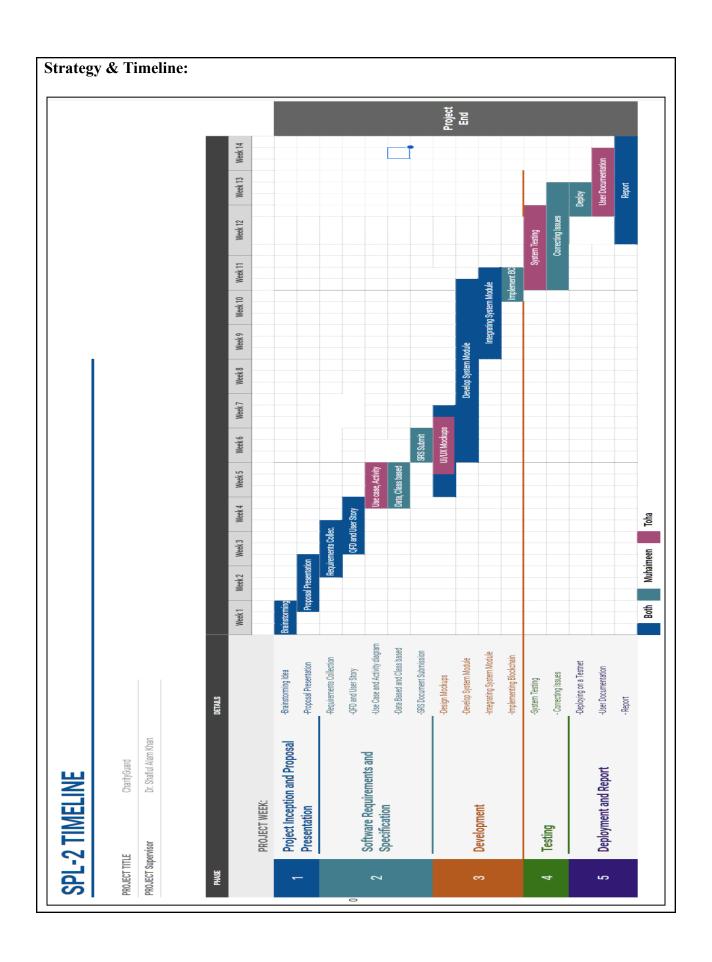

Project Description:
A decentralized charity donation platform that leverages Web3 technology for transparent donations, automated fund management, and community-driven governance.

Normal Requirements:

- Users can create accounts, browse campaigns, and donate.
- Charities can launch campaigns with specified goals and deadlines.
- Smart contracts automate fund transfers based on predefined conditions.
- Blockchain ensures an immutable ledger for transparent donation tracking.

Exciting Requirements:

- Community-driven governance for campaign selection and dispute management.
- Zakat calculation and proper donation channels for Islamic users.
- Generate reports(e.g. audit) as per the operational context

Strategy & Timeline:

Languages or Tools to be used: JS Frameworks, Solidity, Ethereum, Git
